PROFILE

Highly motivated Front-End Developer with hands-on experience in HTML, CSS, JavaScript and React.js and a strong academic background in Artificial Intelligence and Machine Learning. Passionate about creating clean, responsive, and user-friendly web interfaces. Dedicated to continuous learning, with a current focus on expanding expertise into backend technologies to become a Full-Stack Developer.

WORK EXPERIENCE

MBU Devs

2025 - PRESENT

Front-End Web Developer

- Designed and developed responsive user interfaces using HTML, CSS, and JavaScript.
- Improved website usability and performance across multiple devices.
- Collaborated with team members to implement modern front-end features.

PROJECTS

Netflix-Clone

- Developed a Netflix Clone using React.js, Firebase Authentication, and TMDB API with secure user login/signup, dynamic movie browsing, and a responsive user interface.

Technologies: React.js, CSS, Firebase, TMDB

Personal Portfolio Website

- Designed and developed a personal portfolio to showcase projects and technical skills.

Technologies: HTML, CSS, Responsive Design

Automated Cardiac Segmentation System (Final Year Project)

- Developed and implemented a deep learning-based system for automated cardiac image segmentation to support medical image analysis and heart disease monitoring.

Technologies: Python, TensorFlow, Keras, OpenCV

CAREER OBJECTIVE

To secure a front-end web developer position where I can build responsive, user-friendly websites and grow my skills in modern web technologies.
